Project Name	IRevolution: A Data-Driven Exploration of Apple's iPhone Impact in India
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Step-2: Brainstorm, Idea Listing , Grouping and Ideations

3 Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

Cluster 1: Economic Impact

- iPhone exports from India growing
- Premium pricing thousands
- Government PLI scheme support

Cluster 2: Market Trends

- Premium phone sales increasing
- Urban youth prefer iPhones

Cluster 3: Consumer Behavior & Culture

- iPhone seen as status symbol

Cluster 4: Tech Ecosystem

- More iOS developers in India
- App Store revenue rising

Tip

Ask customers to go to sticky notes and label them with terms, concepts, and emotions. Organize them as follows: 1. What's new? 2. What's hot? 3. What's next?

4 Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

Tip

Participants can use this concept to sort ideas by importance and feasibility. The grid is a tool to help you decide which ideas to move forward with. It's not a final decision. It's a starting point.

Importance

Feasibility

Regardless of their importance, ideas which have achieved higher than others' scores are often, simply, not.
